

Session 6, Panel 1 [EMODnet Ocean Best Practices, global data sharing and interoperability]

Speaker: Steve Hall, Nippon Foundation – GEBCO Seabed 2030

- EMODnet is a key supplier of bathymetric data to the General Bathymetric Chart of the Ocean (GEBCO)
 - Data goes directly to our relevant regional Data Centers.
 - The quality is excellent, and submitted in good time for data to be reviewed before integration.
 - We'll work on improved collaboration, for example on metadata aspects & donations from industry.
