

EMODnet by and for wider society

Speaker: Arianna Liconti, OutBe

People who experience the Ocean everyday can be the **many eyes and hands science needs**

Outdoor for good= use of citizen science projects in watersports

- more evidence for marine conservation
- increase in Ocean Literacy
- increase in wellbeing

Data collected: **marine biodiversity** sightings at sea, **plastic pollution** sightings and monitoring, **oceanographical** data collection though low-tech sensors
