Data Coordination Group (DCG)

Develop a data & information strategy

Vision

A trusted, inclusive, and interconnected ocean data and information ecosystem that is actively used for decision making to support sustainable ocean management.

Mission

To catalyse a solution-oriented, global digital transformation for the digital ecosystem we need to overcome the Decade Challenges.

Strategic Objectives

Develop an ocean digital ecosystem that encourages the sharing and equitable access of multidisciplinary data, information and knowledge by all.

Improve data and information discovery and usability across the ocean digital ecosystem.

Build trust in data and information shared across the ocean digital ecosystem.

Prioritise digital solutions that support decisions for sustainable ocean management.

Expand, empower, and mobilise global communities to advance and maintain the ocean

The United Nations
Decade of Ocean Science
for Sustainable Development
(2021-2030)

to advance and maintain the ocean digital ecosystem.

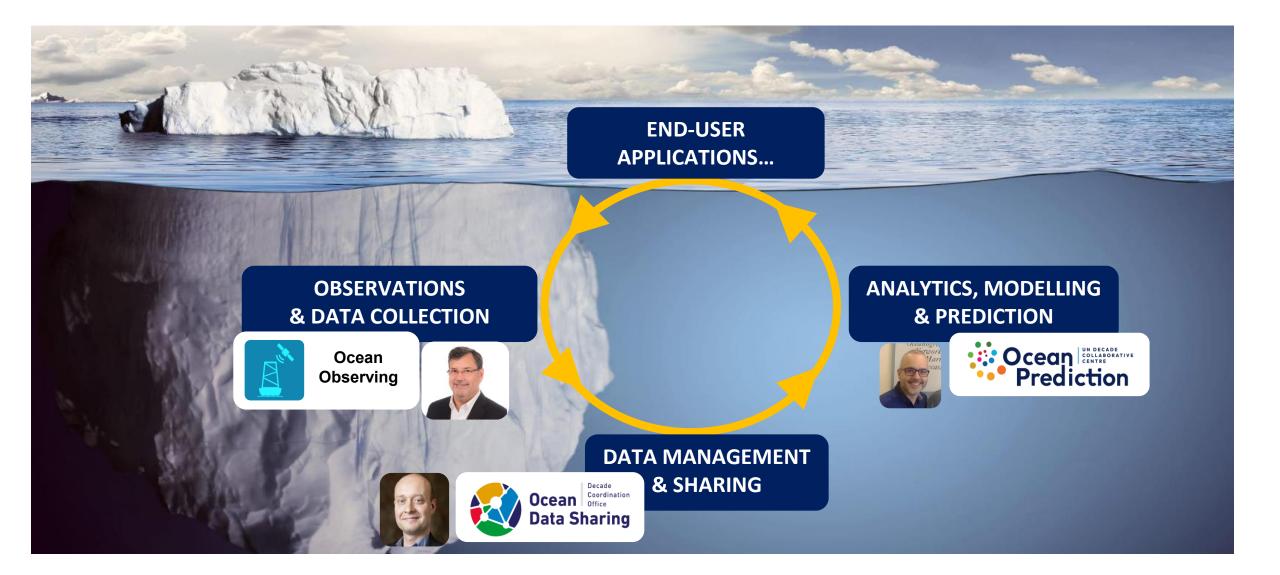

Enablers

Technological Innovation // Partnerships // Durable Resourcing // Policy & Regulatory Frameworks

Lifting up the global digital ecosystem critical components from observation to the end-users

Un Ocean Decade Vision 2030 Working Group 8

Challenge 8: Create a digital representation of the Ocean

THE CO-CHAIRS

Jan-Bart Calewaert

Paula Cristina Sierra-correa

Through multi-stakeholder collaboration, develop a comprehensive digital representation of the ocean, including a dynamic ocean map, which provides free and open access to explore, discover and visualize data and information on the past, current, and future state of the ocean.

THE EXPERT MEMBERS

Ann-Christine **Zinkann**

Dick M.A. **Schaap**

Gerben J. **de Boer**

Toru **Suzuki**

Gustav **Kågesten**

lain **Shepherd**

Tanya **Haddad**

Véronique **Jégat**

Kate Crosman

Marc **Taconet**

Martin **Visbeck**

Mike **Smit**

Ren **Xingyuan**

Peter Teye **Busumprah**

Steve **Hall**

Alain **Arnaud**

Vision 2030 Challenge 8 Digital representation of the Ocean

2030 of Ocean Science Oceanographic Commission

Process towards a Strategic Ambition Setting for Challenge 8 White Paper

WHO ARE OUR USERS

Everyone - diverse in expertise & area, leave no one behind

- professional (hands on)
- professional (not hands on)
- non-professional/public
- other 9 challenges are proxy users defining data & info needs (both content & services)

WHAT DO THEY NEED?

- easy access to ocean data & information (multidisciplinary)
- tools/services for accessing and sharing data, information and knowledge

DIGITAL CONTENT NEEDS

All data types relevant

Focus on <u>priority data products &</u> underpinning data

Data-layers as drivers to pull in data

- Address data-gaps, agree on standards & improve interoperability
- Leverage existing communities
- Must be societally relevant (other challenges)
- Must be co-developed in a transparent process

Global layers must be complemented with local case studies (global south)

DIGITAL SERVICES NEEDS

- 1. Global Ocean Data Discovery and Access Service
- 2. Online user-friendly **Digital Atlas** of the Ocean
- 3. Marine Knowledge exchange mechanisms
- 4. Help Desk Service
- Capacity Development / Sharing and Training facility

NEXT STEPS

- Agree on globally relevant data products: e.g., marine litter/pollution, MPAs, blue carbon,
- Elaborate service ideas, build on what exists / identify existing best practices
- Synergies with other WGs
- Incorporate feedback on strategic ambition
- Involve relevant Actions
- Draft White Paper

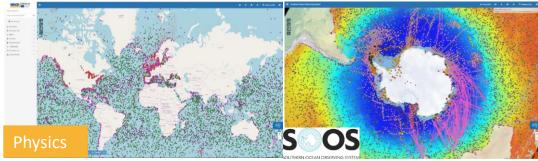

EMODnet as implementor of the **Decade Data and Information Strategy**

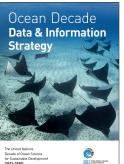

- EMODnet has European and global remit
 - Thematic global coverage
 - Connecting to global data sharing initiatives and services
- EMODnet is a Decade Implementing Partner (DIP)
 - Co-develop/implement Data & Info Strategy
 - Contributes to key Decade Actions (Ditto, OD2030, OBPS)
 - Contributes to achieve Challenge 8 A digital ocean
 - Support the efforts of the DCO-DataSharing
- EMODnet works with other regional services
 - Towards a global interoperable data sharing framework based on FAIR data principles and agreed standards for data, metadata and exchange

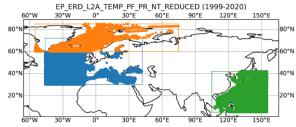

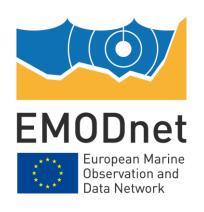

Powering the European Marine Data Ecosystem

For a digital and green future
